King Faisal Specialist Hospital Database

مستشفى الملك فيصل التخصصي ومركز الأبحاث
King Faisal Specialist Hospital & Research Centre

Project Description:

King Faisal Specialist Hospital provides specialized healthcare procedures to its patients. The purpose of this project is to design a database system for King Faisal Specialist Hospital to support and manage data related to booking appointments, managing patient information, and supporting hospital staff operations, especially focusing on the reception area. The database will enable efficient scheduling of appointments, storing patient data, and supporting receptionists in managing these tasks.

View Description:

The receptionist is the first point of contact for patients seeking medical support. The database system will provide various functionalities for receptionists to facilitate appointment bookings, update patient details, manage doctor schedules, and keep records of departmental operations. The system will also allow receptionists to update and delete patient data as needed.

Data Requirements:

- Receptionist

A staff member responsible for managing patient appointments and data. Each receptionist has a unique receptionist ID (primary key), name, phone number, and shift timings. Each receptionist can register any number of patients and can book any number of appointments.

- Patient

An individual receiving medical care at the hospital. Patient records include a file number (primary key), phone number, name, age, gender, and medical history details. Patients (any number) can book zero or many appointments through the receptionist.

- Appointment

An arrangement for a patient to meet a doctor at a specific time and date. Each appointment has an appointment number (primary key), time, date, and status (e.g., confirmed, pending, or canceled). Each appointment is linked to one doctor and is handled by a receptionist.

- Doctor

A medical professional responsible for providing care to patients. Each doctor has a unique doctor ID (primary key), name, department, and phone number. A doctor can be assigned to zero or many appointments.

Transaction Requirements:

Data Entry:

1. Register a new patient
2. Book/ confirm appointments

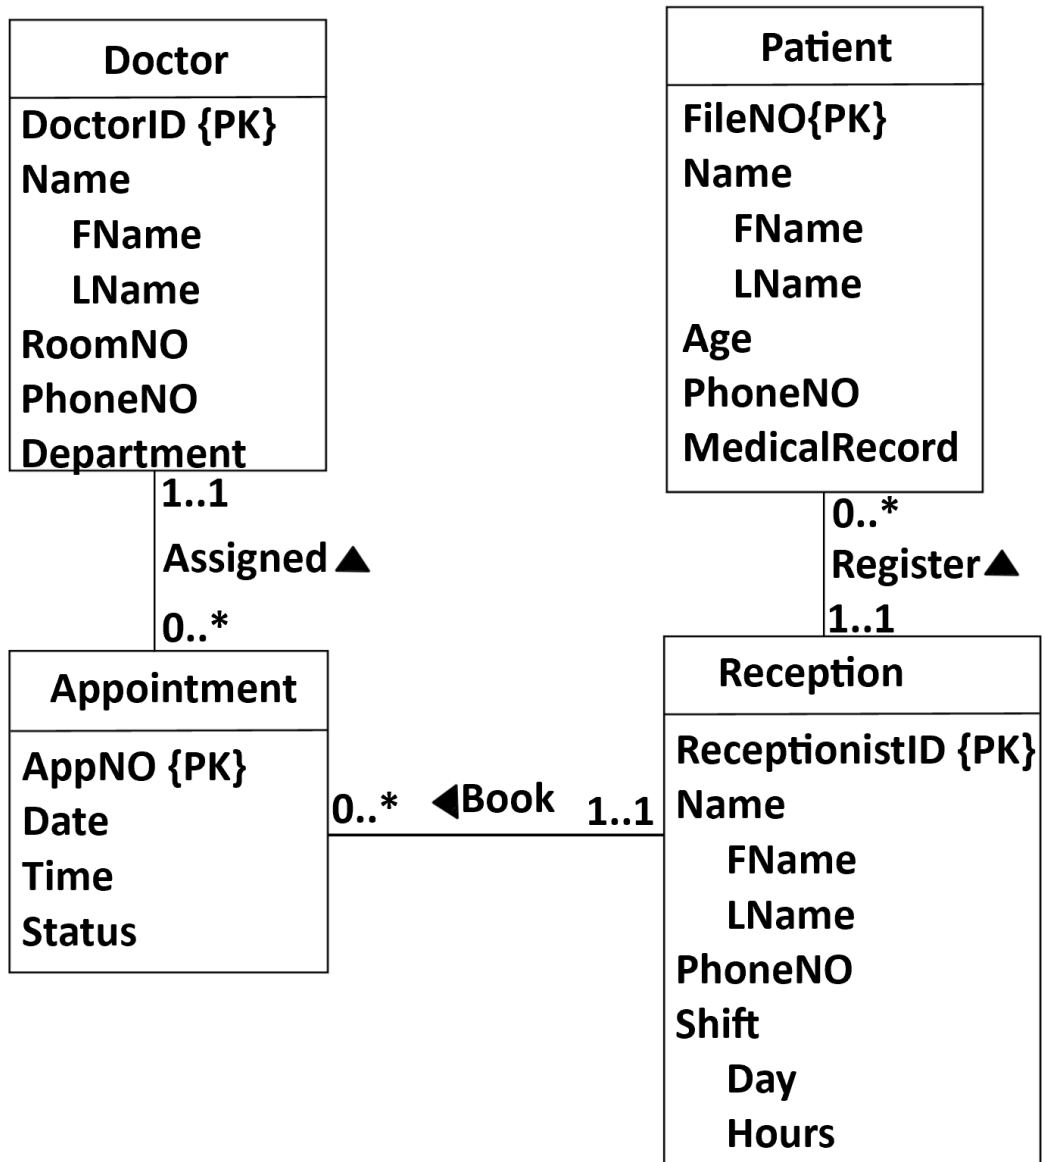

Data update/deletion:

1. Update a patient's medical record.
2. Update/ delete appointments.
3. Update/ delete patient's phone number.

Data Queries:

1. Display all appointments in a day.
2. List all appointments on October 22nd.
3. Display names of doctors in a certain department.
4. List all working receptionists on a certain shift.
5. List all patients who have been treated by the same doctor.
6. List patients who have been treated in the last 6 months.
7. List all receptionists who have worked more than 12 hours this week.
8. Display patients who are younger than 18 years old.
9. Display all appointments where the status is "canceled".
10. List all doctors who have worked in room number 10.

Global enhanced entity relationship diagram (EER):

Relational Schema:

Doctor(DoctorID , FName , LName , RoomNO , Department)

Primary Key DoctorID

Appointment(AppNO , Date , Time , Status , DoctorID , ReceptionistID)

Primary Key AppNO

Foreign key DoctorID references Doctor (DoctorID)

Foreign key ReceptionistID references Reception(ReceptionistID)

Reception(ReceptionistID , FName , LName , PhoneNO , Day , Hours)

Primary key ReceptionistID

Patient(FileNO , FName , LName , Age , PhoneNO , MedicalRecord , ReceptionistID)

Primary key FileNO

Foreign key ReceptionistID references Reception (ReceptionistID)

Data Dictionary showing description of all entities:

Entity name	Description	Occurrence
Doctor	A medical professional responsible for providing care to patients. A person who treats patients and has a valid medical certificate.	assigned for none, one or many appointments.
Appointment	An arrangement for patient to meet a doctor at a particular time and date.	An appointment is assigned to one doctor.
Reception	Manages patient appointments and records, acting as the first point of contact for patients	Each receptionist can register zero or many patients. They can book appointments for any patient with any doctor.
Patient	A person who is receiving medical care in king Faisal hospital.	Each patient can book zero or many appointments. Registered patients interact with receptionists to schedule appointments with doctors.

Data Dictionary showing description of all relationships:

Entity Name	Multiplicity	Relationship	Entity Name	Multiplicity
Appointment	0..*	Assigned	Doctor	1..1
Reception	1..1	Book	Appointment	0..*
Reception	1..1	Register	Patient	0..*

Data Dictionary showing description of all attributes:

Entity Name	Attribute	Description	Data Type	Length	Nulls	Multi-Valued	Default Value	Range	PK
Reception	ReceptionistID	Uniq id number assigned to receptionist	Char	8				0-9	Yes
	FName	Receptionist's first name	Varchar	50					
	LName	Receptionist's last name	Varchar	50					
	PhoneNO	Receptionist's phone number	Varchar	10				0-9	
	Day	The date of the day receptionist is on duty	Date					01/01/2024 - 31/12/2024	
	Hours	Receptionist's working hours	Time					12:00am-11:59pm	

Entity Name	Attribute	Description	Data Type	Length	Nulls	Multi-Valued	Default Value	Range	PK
Patient	FileNo	Uniq number assigned to patient	Char	6				0-9	Yes
	FName	Patient's first name	Varchar	50					
	LName	Patient's last name	Varchar	50					
	Age	Patient's age	int						
	PhoneNO	Patient's phone number	Varchar	10				0-9	
	MedicalRecorded	Recorded contains information about patient's previous visits	Varchar	100					

Entity Name	Attribute	Description	Data Type	Length	Nulls	Multi-Valued	Default Value	Range	PK
Appointment	AppNo	Uniq number assigned to appointment	Char	6				0-9	Yes
	Date	Appointment's date	Date					01/01/2024 - 31/12/2024	
	Time	Appointment time in hours	Time					12:00am-11:59pm	
	Status	Appointment's visit status	Varchar	10				'Confirmed' or 'pending' or 'canceled'	

Entity Name	Attribute	Description	Data Type	Length	Nulls	Multi-Valued	Default Value	Range	PK
Doctor	DoctorID	Uniq id number assigned to doctor	Char	8				0-9	Yes
	FName	Doctort's first name	Varchar	50					
	LName	Doctor's last name	Varchar	50					
	RoomNO	Doctor's room number in the clinic	Varchar	2				1-50	
	PhoneNO	Doctor's phone number	Varchar	10				0-9	
	Department	Doctor's specialty	Varchar	20					

DB tables creation:

Patient

The screenshot shows the Oracle APEX SQL Workshop interface. The 'PATIENT' table is selected in the Object Browser. The DDL tab is active, displaying the following SQL code:

```

1 CREATE TABLE "PATIENT"
2 (
3   "FNAME" VARCHAR2(50 CHAR) NOT NULL ENABLE,
4   "LNAME" VARCHAR2(50 CHAR) NOT NULL ENABLE,
5   "AGE" NUMBER NOT NULL ENABLE,
6   "PHONENO" VARCHAR2(10 CHAR) NOT NULL ENABLE,
7   "MEDICALRECORD" VARCHAR2(100 CHAR) NOT NULL ENABLE,
8   "FILENO" NUMBER,
9   "RECEPTIONISTID" NUMBER,
10  CONSTRAINT "PATIENT_CON" PRIMARY KEY ("FILENO")
11  USING INDEX ENABLE
12 );
13 ALTER TABLE "PATIENT" ADD CONSTRAINT "PATIENT_CON0" FOREIGN KEY ("RECEPTIONISTID")
14 REFERENCES "RECEPTION" ("RECEPTIONISTID") ENABLE;

```

The interface also shows the user 'Hussah' and the schema 'WKSP_DATABASE222'.

RECEPTION

The screenshot shows the APEX SQL Workshop interface. The top navigation bar includes 'APEX', 'App Builder', 'SQL Workshop', 'Team Development', and 'Gallery'. A search bar and user profile 'Hussah . database222' are on the right. The 'SQL Commands' section is active, showing a schema of 'WKSP_DATABASE222'. The command area contains the following SQL:

```
1 INSERT INTO RECEPTION (RECEPTIONISTID, FNAME, LNAME, PHONENO, DAY)
2 VALUES ('1', 'Ali', 'Fahad', '0523765409', TO_DATE ('11/11/2024', 'MM/DD/YYYY'));
3
```

Below the command area, the 'RECEPTION' table is displayed with the following data:

	FNAME	LNAME	PHONENO	DAY	RECEPTIONISTID
✎	Ali	Fahad	0523765409	11/11/2024	1
✎	Haya	Saad	0555678945	11/11/2024	2

Data Queries:

1-Display patients who are younger than 18 years old.

The screenshot shows the APEX SQL Workshop interface. The top navigation bar is the same as the previous screenshot. The 'SQL Commands' section is active, showing a schema of 'WKSP_DATABASE222'. The command area contains the following SQL:

```
1 select *
2 from PATIENT
3 where AGE < 18;
```

Below the command area, the 'Results' section is active, displaying the following data:

FILENO	FNAME	LNAME	AGE	PHONENO	MEDICALRECORD
456789	raed	Alkhalifah	14	053568399	Blood Type: B- Vital Signs: Blood Pressure: 145/90 mmHg Heart Rate: 88 bpm Temperature: 99.1°F

2-Display all appointments where the status is "Canceled".

The screenshot shows the SQL Workshop interface with the following details:

- SQL Commands:** The query is:

```
1 select *
2 from APPOINTMENT
3 where STATUS = 'Canceled';
```
- Schema:** WKSP_DATABASE222
- Language:** SQL
- Rows:** 10
- Buttons:** Clear Command, Find Tables, Save, Run
- Results:** The results are displayed in a table with the following columns: APPNO, APPOINTMENTDATE, APPOINTMENTTIME, and STATUS.

APPNO	APPOINTMENTDATE	APPOINTMENTTIME	STATUS
A003	11/17/2024	09:00 AM	Canceled

1 rows returned in 0.01 seconds

3-Display names of doctors in a certain department.

The screenshot shows the SQL Workshop interface with the following details:

- APEX:** App Builder, SQL Workshop, Team Development, Gallery
- Search:** Search bar
- Schema:** WKSP_DATABASE222
- Language:** SQL
- Rows:** 10
- Buttons:** Clear Command, Find Tables, Save, Run
- SQL Commands:** The query is:

```
1 select FNAME, LNAME
2 from doctor
3 where department = 'Heart center';
```
- Results:** The results are displayed in a table with the following columns: FNAME and LNAME.

FNAME	LNAME
Fahd	Alzahrani
Layan	Alsubaiei
Feras	Alkhalil

3 rows returned in 0.01 seconds

4- List all doctors who have worked in room number 10.

The screenshot shows the APEX SQL Workshop interface. The top navigation bar includes 'APEX', 'App Builder', 'SQL Workshop', 'Team Development', and 'Gallery'. A search bar and user profile 'Hussah . database222' are on the right. Below the navigation bar, the 'SQL Commands' section is active, showing a query:

```
1 select *
2 from doctor
3 where roomNO = 10
```

 The 'Schema' dropdown is set to 'WKSP_DATABASE222'. The 'Language' is 'SQL' and 'Rows' is '10'. The 'Run' button is highlighted. Below the query editor, the 'Results' tab is selected, displaying a table with 6 columns: DOCTORID, FNAME, LNAME, ROOMNO, PHONENO, and DEPARTMENT. The table contains 2 rows of data. The status bar at the bottom indicates '2 rows returned in 0.01 seconds' and provides a 'Download' link.

DOCTORID	FNAME	LNAME	ROOMNO	PHONENO	DEPARTMENT
766243	Fahd	Alzahrani	10	0537664186	Heart center
221005	Layan	Alsubaiei	10	0535465234	Heart center

5- list all patients who have been treated by the same doctor.

The screenshot shows the APEX SQL Workshop interface. The top navigation bar is the same as the previous screenshot. The 'SQL Commands' section shows a query:

```
1 SELECT P.FNAME AS PATIENT_FNAME, P.LNAME AS PATIENT_LNAME
2 FROM DOCTOR_NEW D
3 JOIN
4 | APPOINTMENT A ON D.DOCTORID = A.DOCTORID
5 JOIN
6 | PATIENT P ON A.RECEPTIONISTID = P.RECEPTIONISTID
7 WHERE D.DOCTORID = '2'
8 ORDER BY P.FNAME, P.LNAME;
9
```

 The 'Schema' dropdown is set to 'WKSP_DATABASE222'. The 'Run' button is highlighted. Below the query editor, the 'Results' tab is selected, displaying a table with 2 columns: PATIENT_FNAME and PATIENT_LNAME. The table contains 2 rows of data. The status bar at the bottom indicates '2 rows returned in 0.01 seconds' and provides a 'Download' link.

PATIENT_FNAME	PATIENT_LNAME
dema	Alkhalifah
raed	Alkhalifah

6- list all receptionists working a certain shift

The screenshot shows the Oracle APEX SQL Workshop interface. The top navigation bar includes 'APEX', 'App Builder', 'SQL Workshop', 'Team Development', and 'Gallery'. A search bar and user profile 'Hussah . database222' are on the right. The 'SQL Commands' section is active, showing a query in the editor:

```
1 select *
2 from RECEPTION
3 where DAY='12/11/2024';
```

The 'Results' tab is selected, displaying 'no data found'. The footer shows the user 'hussah.xf@gmail.com', database 'database222', and copyright information for Oracle APEX 24.15.

7- Display all appointments in a day (November 15, 2024.)

The screenshot shows the Oracle APEX SQL Workshop interface with a query to display all appointments on November 15, 2024. The query in the editor is:

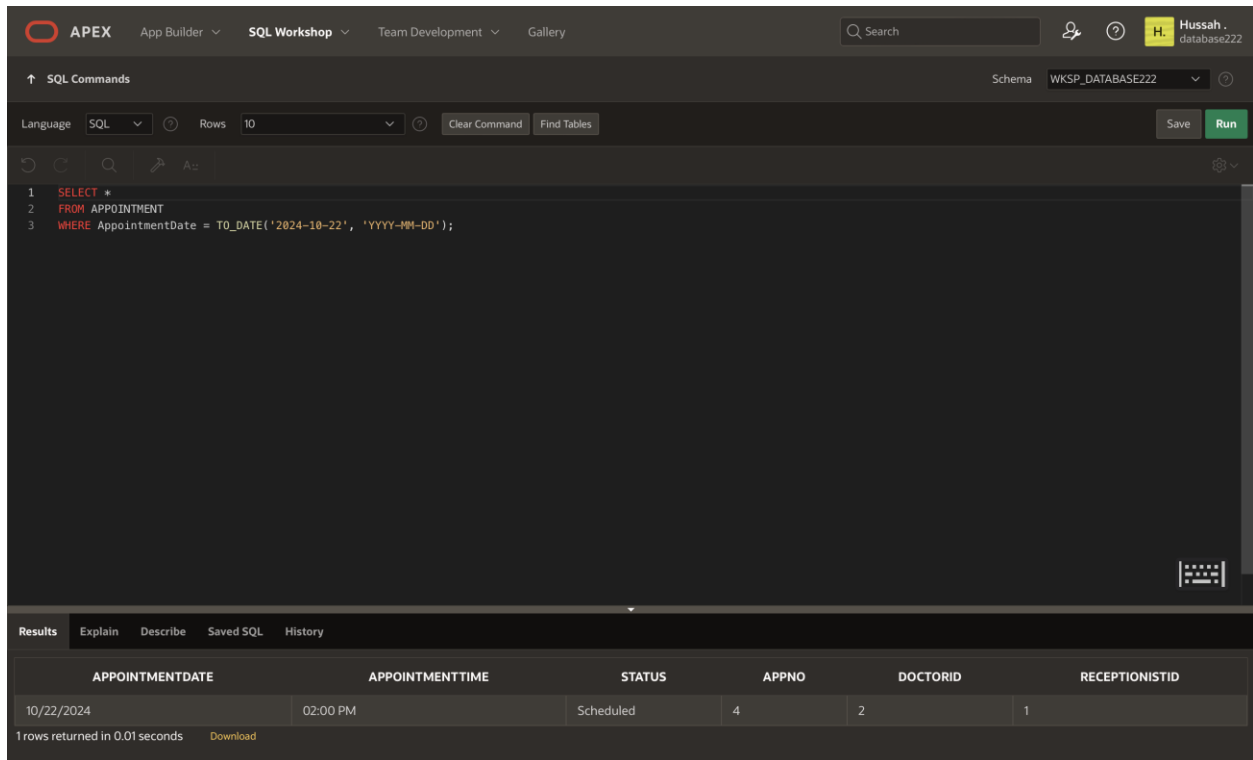

```
1 SELECT *
2 FROM APPOINTMENT
3 WHERE AppointmentDate = TO_DATE('2024-11-15', 'YYYY-MM-DD');
```

The 'Results' tab is selected, displaying a table with one row of data:

APPOINTMENTDATE	APPOINTMENTTIME	STATUS	APPNO	DOCTORID	RECEPTIONISTID
11/15/2024	10:30 AM	Scheduled	1	3	1

Below the table, it states '1 rows returned in 0.01 seconds' and provides a 'Download' link.

8>Returns all appointments scheduled for October 22nd.

The screenshot displays the APEX SQL Workshop interface. At the top, the navigation bar includes 'APEX', 'App Builder', 'SQL Workshop', 'Team Development', and 'Gallery'. A search bar and user profile 'Hussah . database222' are on the right. Below the navigation bar, the 'SQL Commands' section shows the 'Language' set to 'SQL' and 'Rows' set to '10'. The SQL command area contains the following query:

```
1 SELECT *
2 FROM APPOINTMENT
3 WHERE AppointmentDate = TO_DATE('2024-10-22', 'YYYY-MM-DD');
```

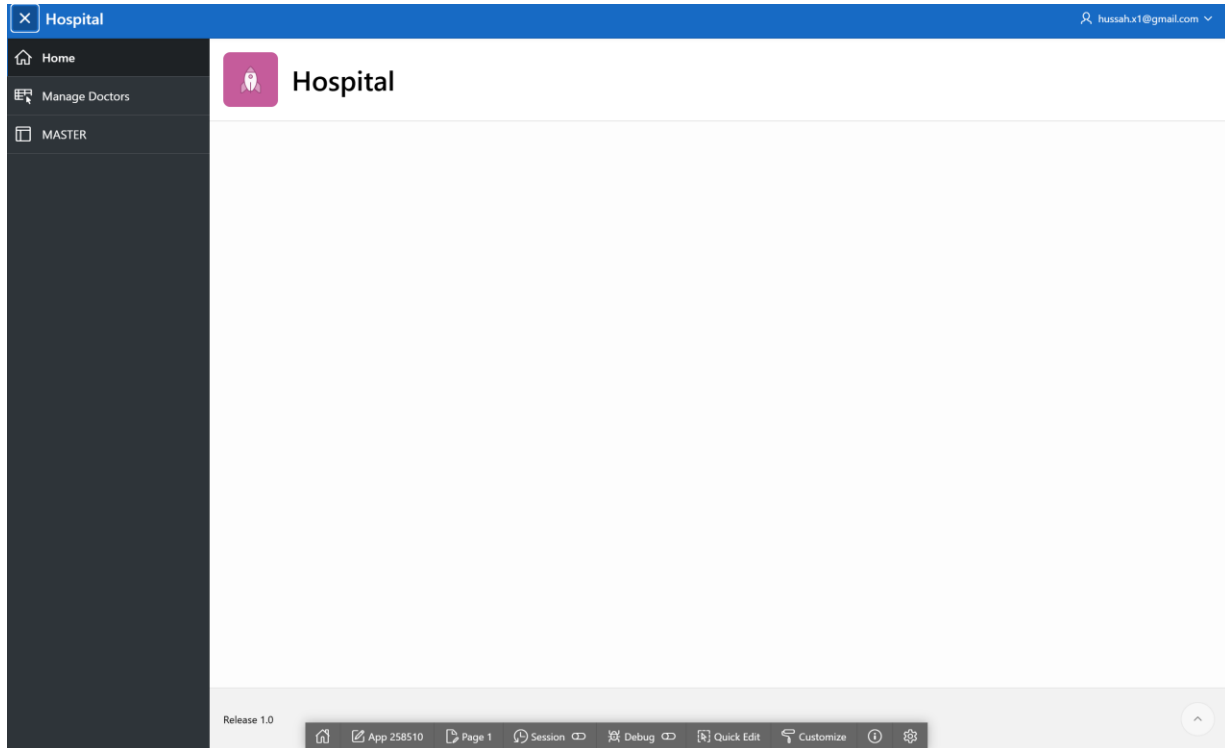

Below the command area, the 'Results' tab is active, showing a table with the following data:

APPOINTMENTDATE	APPOINTMENTTIME	STATUS	APPNO	DOCTORID	RECEPTIONISTID
10/22/2024	02:00 PM	Scheduled	4	2	1

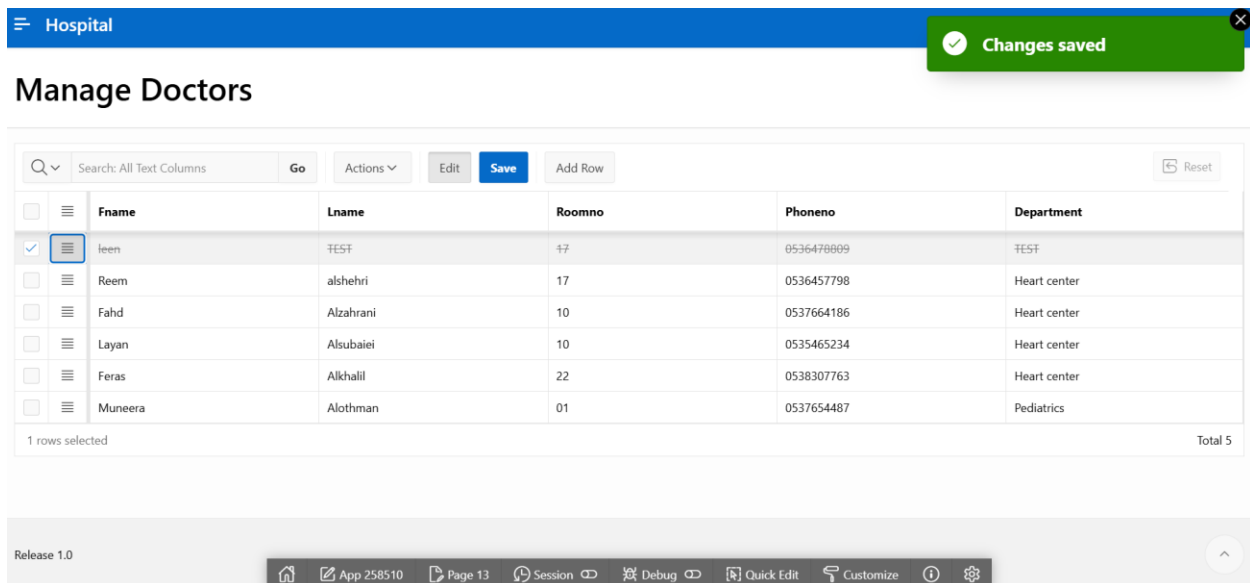

At the bottom of the results section, it states '1 rows returned in 0.01 seconds' with a 'Download' link.
